THE FAR EASTERN REPUBLIC.

ALLEGED FRANCO-JAPANESE CONSPIRACY

WASHINGTON, January 2.
The delegation of the Far Eastern republic of which has come here to ask for a hearing in regard to the Siberian question has published alleged secret correspondence between Japan and France in regard to a supposed Franco-Japanese proposal to act in concert at the Washington conference in respect to the establishment of a Japanese protectorate in Siberia in regard to which it is alleged that France promised support by all means provided Japan took consideration of French interests in the Chinese Eastern Railway, Manchuria, and in concessions and participated in the restoration of Russia. The Franco-Japanese delegations describe the allegations as forged and malicious fabrications. M. Kaumner, director of the Far Eastern department of the French foreign office declared that the French Government has had no communication whatever with Japan respecting a protectorate. Mr. Hanihara declared there was no shadow of truth in the documents so far as Japan was concerned and therefore they must be forgeries.

THE PRINCE'S TOUR.

VISIT TO THE "CITY OF SILK."

The Prince of Wales arrived at Rangoon at daylight on Monday by the "Dufferin" from Bombay. The city was richly decorated; the main streets being spanned by ten golden pandals surmounted with many exquisite pagodas. Various communities represented by groups along the route offered a welcome with quaint songs and picturesque symbols. There were immense crowds everywhere, characteristically impassive but unmistakably friendly.

The Prince received an address of welcome and visited the University where the students presented him with bouquets. He saw a big gathering of service men at Dalhousie Park. The whole scene was like one vivid cinema-colour panorama in this wonderful "city of silk."

FRANCE TRADE PROSPECTS.

A BRIGHTER OUTLOOK.

PARIS, January 2.
According to papers expressing views on the New Year's prospects the trade crisis is receding on all sides, the momentum which has been taken lately by cotton and steel industry being especially noticeable. Thanks to lower prices for coal, better railroad facilities and cheapness of freight the French foundries and steel works are again coming into their own in foreign markets. Some orders for spinning machines, cane crushing mills and electrical machinery are coming in which are considered a good omen. Some apprehensions are expressed concerning the next wheat crop owing to drought having impeded the autumnal sittings. —Havas.
